

# Your Organization Probably Needs an LMS

## Here's Why...

### Online, On-Demand Learning:

You are busy. Your team is busy. You both need a training resource that can adapt to the ever changing needs, requirements, and external factors that affect your business.

### New Employees Want Training:

A 2017 survey conducted by Go2HR found that 40% of employees who do not receive enough job training leave within year 1 when starting with a new company.

### Level Playing Field for a Global Workforce:

Online learning distributed and tracked via an LMS allows organizations to provide a baseline expectation to teams and employees regardless of site or region.

### Make Rapid, Global Changes Instantly:

As pace of business continues to accelerate, training needs to keep stride in order to be impactful.

An LMS allows leaders to make real time alterations at the drop of the hat.

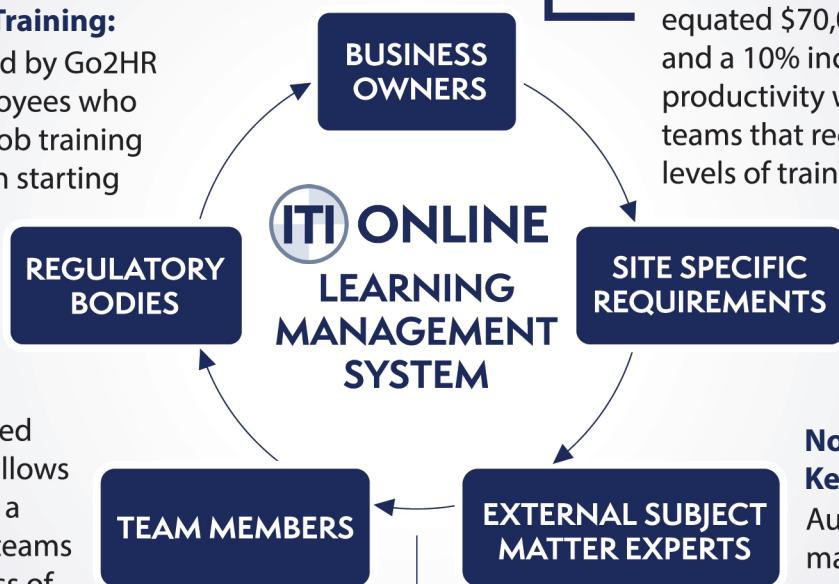

### Engagement and a Path Forward:

A 2015 Mercer survey revealed a path of upward mobility at their current organization is a motivating factor for 78% of employees, with training and continuous improvement being a key driver of that figure.

### Training Impacts the Bottom Line:

IBM's The Value of Training study equated \$70,000 in annual savings and a 10% increase of overall productivity was achieved via teams that receive appropriate levels of training.

### No More Record-Keeping Headaches:

Automate certification management and other recordkeeping via your LMS. Don't ever "pay the premium" in a rush to keep certifications current again.

### Fast, Detailed, Accurate Reporting:

Managers and organizational leaders have enough to worry about.

Let your LMS handle reporting and proof-of-qualifications.

### Engage Employees with Diverse Content:

Everyone learns differently. An LMS allows you to leverage these differences via the following types of training content – personalized, gamified, micro-learning, interactive, and more.

#### 4 Content Libraries:

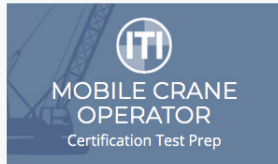

- Cranes & Rigging
- Rigging Engineering
- Plant Maintenance
- Industrial Safety

#### LMS Options:

- Turn Key Setup
- Integrate with your current system
- Enterprise Licensing
