

Instructor-Led Training Designed for Safety, Quality, and Performance

Building Skills That Go Beyond Compliance

Every year, organizations spend millions on training that checks a compliance box but doesn't translate into real-world performance. Slide decks and lectures may cover regulations, but they don't prepare teams to safely operate equipment, respond to high-pressure situations, or solve problems in the field. The result? Ongoing skill gaps, preventable safety incidents, and costly downtime.

ITI's instructor-led training (ILT) changes that equation. Delivered at your site or our own training centers, your team receives hands-on instruction from industry experts in a workshop-style program with real-world scenarios and live loads. By putting people in realistic situations, we ensure learners build lasting technical competency that drives safer, more reliable performance on the job.

With ILT, you'll see measurable impact where it matters most:

- **Reduce Risk:** Expert-led, hands-on training equips operators and riggers to avoid costly mistakes and injuries.
- **Prevent Project Delays:** Better-prepared crews keep lifts on schedule and reduce expensive crane idle time.
- **Accelerate Workforce Readiness:** New operators ramp faster while experienced riggers and lift directors sharpen critical skills.
- **Standardize Performance Across Crews:** Consistent training delivers safer, more reliable performance – no matter the site, crew or project.

Comprehensive Solutions for Every Business Need

We offer a comprehensive suite of instructor-led training options, delivered by expert instructors with decades of field experience. No matter your team's size, location, or equipment, we make sure training is relevant, practical, and immediately applicable on the job.

Training Options Include:

- **Training Centers:** Gain hands-on training in purpose-built facilities with real equipment and expert instructors, giving your team a safe, immersive environment to build technical mastery.
- **Client-Site Courses:** Bring our award-winning training directly to your team with courses conducted at your location. Training is customized to your equipment and workflows, reducing travel costs and time away from the job.
- **Virtual ILT:** Access live, interactive sessions that mirror classroom learning with discussions, exercises, and Q&A.
- **Field Services:** Extend ILT with field advisory services, lift planning, procedure manuals, and accident investigations that improve safety and operational consistency.

Proven Uses Across Operations

Here are the courses leading organizations leverage to build safer, more capable teams across the full lift lifecycle:

- **Certification and Supervisor Development:** Programs like *Master Rigger*, *Crane and Rigging Management Bootcamp*, *Lift Director Training*, and *Accident Investigation* prepare leaders to set and enforce safety standards.
- **Crane Operator and Rigger Training:** Foundational through advanced courses, from *Basic Rigging and Inspection* to *Bull Rigging* and *Overhead Crane Inspector* and *Tower Crane Operator* equip operators and riggers with the skills to work safely, efficiently, and in compliance with industry standards.
- **Specialized Support Services:** *Train-the-Trainer* programs, policy and procedure review and development, and field advisory services ensure training is embedded into your operations long-term.

Course Spotlight: Intermediate Rigging

Rigging the right way takes skill. ITI's Intermediate Rigging Course equips crews with hands-on training to work safely and efficiently.

- Train on real loads with expert instructors in workshop-style sessions.
- Learn core skills like sling inspection, load weight estimation, sling angles, and safe lift planning.
- Get lasting tools including a full workbook, quick-reference cards, and an optional qualification for compliance.

Trusted by Leading Industrial Companies

Our instructor-led training is trusted by leading industrial companies to improve readiness, build critical skills, and train safely at scale.

**BLUE
ORIGIN**

"If we can stop just one incident from happening, then the training has paid for itself. I consider ITI to be more than a vendor-supplier. Over the years, we have built a good relationship based on trust and integrity. I know when they commit to a project; the result will be the best safety program available."
